RCBS' New Pro Chucker Tube Case Feeder Increases Efficiency

Take Your RCBS Pro Chucker to the Next Level with the New Tube Case Feeder

OVERLAND PARK, Kansas (May 25, 2016) – RCBS, the leading manufacturer of ammunition reloading equipment for rifles and pistols, announces the release of the new Pro Chucker Tube Case Feeder. The Case Feeder installs on RCBS' high-performance, maximum output Pro Chucker 5 or Pro Chucker 7 progressive presses to provide automated case feeding for both Bottleneck and Straight Wall cases.

“The Pro Chucker 5 and the Pro Chucker 7 are top auto-indexing presses on the market,” said Curtis Smith, RCBS Product Director. “They offer a load rate of approximately 600 rounds per hour, and Pro Chucker 7 was the first seven-station auto-indexing press on the market. We wanted to offer our users even more efficiency, so we developed this reliable case feeder to increase output by more than 25 percent.”

The model 88915 Tube Case Feeder includes a medium feed tube that accommodates 80 percent of the Pro Chucker case fits. The addition of the model 88916 combo of Small and Large Feed Tubes allows the user to automatically feed cases for all Pro Chucker Shell Plate fits. Plus, other powered case collators and feeders can be adapted to feed the RCBS Pro Chucker Tube Case Feeder.

RCBS is a brand of Vista Outdoor Inc. It is the leading manufacturer of ammunition reloading equipment for rifles and pistols, offering reloading equipment throughout the world. For more information, please visit www.RCBS.com.
