Federal Launches Syntech Component Bullets for Handloaders

ANOKA, Minnesota – August 14, 2017 – Federal Ammunition is pleased to announce it is now offering popular American Eagle Syntech Total Synthetic Jacket (TSJ) bullets as components for handloading, allowing both competitive and casual shooters to load Syntech to their own specifications and pressures. The competitively priced component bullets are available in three popular handgun caliber options. Shipments are being delivered to dealers.

With an exclusive TSJ polymer jacket that eliminates copper fouling and decreases heat and friction, Syntech loads have redefined the range ammunition category. Now handloaders can get the benefits of the same groundbreaking design in Syntech component bullets. The advanced range projectiles provide clean, accurate, consistent performance, as well as less splash-back on steel targets.

Features & Benefits

- Polymer-encapsulated Syntech bullet prevents metal-on-metal contact in the bore
- Eliminates copper and lead fouling
- Decreases heat and friction, extending barrel life
- Significantly reduces the required frequency of cleaning
- Absence of a copper jacket minimizes splash-back on steel targets
- 100-count packs
