Night Optics Introduces New Sentry 14 1x 4G Night Vision Monocular

OVERLAND PARK, Kansas – July 5, 2017 – Night Optics USA, an industry leader in the production of innovative, professional quality night vision gear, introduces the new [Sentry 14 1x 4G Night Vision Monocular](#).

Rich in features, including the latest in crystal-clear, 4G tube technology, the Sentry 14 1x 4G boosts low-light detection and recognition ranges to new heights, allowing users to locate and engage targets at greater distances than ever before—even in total darkness.

The highly versatile Sentry 14 system can be hand held or helmet mounted for hands-free navigation. When paired with a quality spotting scope, target detection extends well beyond 600 yards. It can also be weapon mounted when coupled with a daytime, close-quarters battle sight or an IR laser.

“The simple yet reliable, three-position switch allows users to easily toggle between off, on and momentary settings,” said Ben Bainter, Night Optics Product Manager. “Plus, constant IR and manual gain control make the 4G’s low halo factor the perfect fit for virtually all light levels.”

Lightweight, rugged and 100 percent Mil-Spec, the Sentry 14 1x 4G is the best choice for the widest variety of scenarios, distances and conditions. It is waterproof to 66 feet and shrugs off harsh weather conditions that would shut down other optics. Plus, thanks to its energy efficient design, it runs 40 hours on one AA battery.

The [Sentry 14 1x 4G](#) is also easy to customize. It accommodates a variety of accessories, including an IR-K2 Pro Extra Long-Range IR Illuminator, 3x or 5x Mil-Spec Afocal Night Vision Lens, iPhone and night vision camera adaptors, quick-release weapon mount, and more.

Features & Benefits

- Superior 4G autogated Photonis tube
- Ultra-fast operation
- Class-leading detection, recognition and identification range
- Mil-Spec optics

- Manual gain control
- Weapon/helmet mountable
- Internal low-battery and IR indicators

Part No. / Description / MSRP
