Federal Ammunition Gold Medal Paper FITASC Loads Now Available

ANOKA, Minnesota – June 28, 2024 – Federal Ammunition adds two shotshell loads, optimized for FITASC competitions, to its popular Gold Medal Paper product line. These new loads are now available at select dealers.

“These new paper shotshells feature a 28-gram payload that’s ideal for international FITASC competition,” said Federal’s Shotshell Product Manager Josh Vickers. “Like all Gold Medal Paper loads, they feature a high-quality brass head, harder shot, and two-piece SoftCell wad design that reduces felt recoil and improves patterns.”

Features and benefits include an exclusive Federal Premium paper hull design; two-piece wad utilizes SoftCell technology to decrease perceived recoil and produce more uniform patterns compared to one-piece designs; the brass head ensures flawless cycling and extraction; the lead shot is engineered for the optimum blend of hardness and density for even patterns and maximum downrange power.

The current Gold Medal Paper product lineup includes eleven cartridge options. The two new FITASC loads are 12-gauge, 2 ¾-inch, 28-gram, 1,330-feet-per-second at muzzle, 3 ½-dram in size No. 7 ½ or 8. They are available in 25-count boxes at an MSRP of \$20.99.
