Remington Launches Premier AccuTip MZ for Muzzleloaders

LONOKE, Ark. – January 23, 2023 – [Remington Ammunition](#) has announced a new bullet exclusively engineered for muzzleloaders, Premier AccuTip MZ. Designed for muzzleloading hunting with both modern or traditional 50 caliber rifles, Premier AccuTip MZ's muzzleloading bullets/sabots provide exceptional accuracy and dramatic performance on big game.

Premier AccuTip MZ's bonded bullet is guided by the innovative Power Port™ Tip, the same industry-leading technology used in Remington's popular Premier AccuTip rifled shotgun slugs. On impact, the tip enables quick expansion for deadly energy transfer while the 260-grain bonded bullet provides optimal penetration and 97%+ weight retention.

Tested and accurate with all leading muzzleloading propellants, Premier AccuTip MZ's bonded bullets pair with an easy loading sabot for quick reloads, making this product Remington's deadliest muzzleloader bullet yet.

"Remington is thrilled to present hunters with the Premier AccuTip MZ, a bullet that they can rely on for consistent performance on deer, elk and more," said Remington's Muzzleloader Product Line Manager Ronnie Evans. "We are proud to offer hunters a bullet that combines deadly accuracy, high weight retention, and exceptional performance at all common muzzleloading ranges."

Available in 12 bullet packaging, Premier AccuTip MZ's bullets/sabots come in convenient quick loading tubes for access in the field or at the range.
