CCI Announces New Blazer Brass Clean-Fire Suppressor Product Line

LEWISTON, Idaho – January 28, 2026 – CCI Ammunition recently announced its all-new Blazer Brass Clean-Fire Suppressor, a new product line engineered to deliver optimal performance through suppressed handguns and carbines. The three subsonic loads feature Total Metal Jacket (TMJ) bullets, clean-burning powders, and lead-free primers to reduce fouling in suppressors. The new loads are 9mm Luger 147-grain, 40 S&W 180-grain, and 45 Auto 230-grain.

“Shooters who utilize suppressors want ammunition that runs clean, performs consistently, and minimizes maintenance,” said Handgun Product Line Specialist Gen Quale. “Blazer Brass Clean-Fire Suppressor delivers reliable subsonic performance while significantly reducing fouling in both the barrel and suppressor.”

Clean-Fire loads feature fully enclosed Total Metal Jacket bullets and lead-free primers designed to reduce heavy-metal fouling. Shooters will also benefit from less residue in both the barrel and the suppressor for easier maintenance, along with loads that meet power factor requirements for competitive shooting.

About CCI Ammunition

Dick Speer founded Cascade Cartridge, Inc. in 1951 next to the Snake River in Lewiston, Idaho. The company manufactured and marketed centerfire primers for

government use in its infancy. CCI now develops them for sporting applications and is the world leader in rimfire products. The company also produces industrial powerloads and Blazer ammunition. CCI is a brand of The Kinetic Group, owned by CSG, a globally diversified industrial group based in Prague (Czech Republic).
