

FOR IMMEDIATE RELEASE

## **Remington Launches Three New Loads in the Popular 7mm Backcountry Cartridge**

**LONOKE, Ark. – January 19, 2026** – Remington Ammunition announces that several of its time-tested product lines will load the popular, new, and award-winning 7mm Backcountry hunting cartridge as three new products for 2026.

The 7mm Backcountry high-performance cartridge utilizes the proprietary Peak Alloy case technology to deliver high velocities from shorter barrels, making it ideal for hunting with suppressors. Three new loads include Core-Lokt 175-grain, Core-Lokt Tipped 175-grain, and Premier® Long Range Speer Impact 175-grain.

“Remington’s Premier Long Range ammunition, featuring Speer Impact bullets, brings precision and bone-crushing performance to the farthest reaches,” explained Remington’s Centerfire Product Director, Kris Carson. “Its tough, bonded construction, and the Slipstream Polymer Tip helps the bullet to open effectively and efficiently for the ultimate in terminal performance. In addition, the highest quality Remington primers and propellants are used to help deliver Premier performance. This might be Remington’s deadliest big game ammunition yet.”

“With the tipped version, it’s fair to say the Core-Lokt legend just became more legendary,” continued Carson. “Core-Lokt Tipped delivers outstanding on-game performance with improved accuracy and long-range potential. Core-Lokt Tipped flies truer, flatter and has devastating terminal energy. It’s the consistent choice of serious hunters all over the world.”

“Since 1939, more hunters have relied on standard soft-point Remington Core-Lokt than any other big game ammunition, and rightly so,” concluded Carson. “It’s our best-selling hunting ammunition of all time due to its consistent results on a huge variety of game. Hunters across the globe know it and trust it as the deadliest mushroom in the woods.”

7mm Backcountry provides superior ballistics and terminal performance through compact, shorter-barreled suppressed rifles, producing 3,000 fps velocities with 175-grain bullets through 20-inch barrels. The cartridge achieves all of this through the patented Peak Alloy case. The next-generation, one-piece case design of an advanced, high-strength alloy allows higher velocities over modern brass case ammunition.

Attendees of the 2026 SHOT Show, January 20–23 at the Venetian Expo and Caesars Forum in Las Vegas, Nevada, are encouraged to stop by Booth No. 11838 for a first-hand look at these new products and more.

Remington Ammunition products are available at dealers nationwide and online. For more information on Remington ammunition and to sign up for product news and special offers, visit [www.remington.com](http://www.remington.com).

### **About Remington**

From muskets to modern day, generations of hunters and shooters have trusted Remington ammunition and accessories. Loaded in Lonoke, Arkansas, by American workers, our wide array of pioneering sporting and hunting ammunition promises to get the job done every time the trigger is pulled. At Remington, we're here for everyone who loads a round of ammo into a handgun, rifle, or shotgun. Founded in 1816, Remington has played a significant role in American history, fighting and winning wars, providing food for millions, and uniting countless generations at the range and in the field. Remington is proud of every round that rolls off the factory line. An ammunition brand of The Kinetic Group, owned by CSG, a globally diversified industrial group based in Prague (Czech Republic), Remington is bringing a renewed focus to ammunition, innovation, and quality – all while staying true to Remington's legendary heritage and stature as an American icon.
